

# Troubleshooting

- [Before After Image Slider](#)
  - The image search only shows older images/ doesn't show all images

## Before After Image Slider

### The image search only shows older images/ doesn't show all images

There may be two reasons for this.

1. You've created a new page and are still within the edit mode. Please do the following then:
  - a. Create and save the page
  - b. Upload your images
  - c. Edit the page and insert the macro
2. When you search for images within the macro editor and don't see your latest uploads, your index is probably not up to date.
  - a. Try rebuilding the index: <https://confluence.atlassian.com/doc/content-index-administration-148844.html>
