KARMA 1.2 breaks Confluence 'Tip' macro

A CSS definition causes a wrong layout of the Confluence 'Tip' macro. This issue will be fixed in the next release.

For the moment you can use the following **workaround**:

Insert this stylecode into your global Administration > Stylesheet section to fix the styling.

```
body .success {
  color: #333;
  text-align: left;
}

#givemedalcontainer .success {
  color: green;
  text-align: center;
}
```

Detailed information is available at the ticket:

⚠ Unable to render Jira issues macro, execution error.
