## Macro paramaters

| Label             | Parameter    | Default      | Description                                                                                                                                                             | Hosting Type  |
|-------------------|--------------|--------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Sources           | sources      | Current page | Specify the title of space or page which contains the images or image title you want displayed. You can specify more than one source in autocomplete field.             | Server        |
| Labels            | labelsFilter |              | Filters the images to display, based on a list of labels. If you wish to enter more than one label, separate the labels with commas.                                    | Server, Cloud |
| Number            | maxNumber    | 200          | Maximum number of images.<br><br><i>Admin can define global max limit for application. Value of global max limit will be used if default or custom value is higher.</i> | Server, Cloud |
| Sort Images By    | sort         | name         | Specify an attribute to sort the images by. Sort order is ascending, unless you select the Reverse Sort parameter (see below).                                          | Server        |
| Sort              | reverse      | ascending    | Used in combination with the Sort Images By parameter above. Use Reverse Sort to reverse the sort order, from ascending to descending.                                  | Server        |
| Size              | itemSize     | 200          | Size of image container in pixel.                                                                                                                                       | Server, Cloud |
| Vertical gutter   | gutterX      | 15           | Size of vertical gutter in pixel.                                                                                                                                       | Server, Cloud |
| Horizontal gutter | gutterY      | 15           | Size of horizontal gutter in pixel.                                                                                                                                     | Server, Cloud |
| Animate           | animate      | Yes          | Image positioning will be animated, for instance when the page is resized.                                                                                              | Server, Cloud |
| Captions          | captions     | No           | Image comment as caption.                                                                                                                                               | Server        |

The first part of the paper discusses the importance of understanding the cultural context of the research. It highlights how cultural differences can influence the interpretation of data and the design of the study. The author argues that researchers must be aware of these differences to avoid misinterpretation and to ensure the validity of their findings.

In the second part, the author explores the challenges of conducting research in a multicultural environment. One of the main challenges is the lack of a common language or shared values. This can lead to misunderstandings and conflicts between researchers and participants. The author suggests that researchers should use a variety of methods to gather data, including interviews, focus groups, and surveys, to ensure that they are capturing a wide range of perspectives.

The third part of the paper discusses the importance of ethical considerations in research. The author argues that researchers must be aware of the potential for harm to participants and must take steps to minimize this risk. This includes obtaining informed consent from participants and ensuring that the research is conducted in a fair and equitable manner.

In the final part, the author discusses the importance of communication in research. The author argues that researchers must be able to communicate their findings effectively to a wide range of audiences, including policymakers, the media, and the general public. This requires the use of clear and concise language and the ability to translate complex research findings into accessible information.

The first part of the paper discusses the importance of the research and the objectives of the study. It then proceeds to a literature review, where the existing research on the topic is examined. The methodology section describes the research design and the data collection process. The results section presents the findings of the study, and the conclusion summarizes the main points and offers suggestions for future research.

The study was conducted in a laboratory setting, where the participants were asked to perform a series of tasks. The data was collected using a specialized software program, which allowed for the precise measurement of the variables of interest. The results of the study are presented in a series of tables and graphs, which clearly illustrate the findings. The conclusion of the study is that the research objectives have been achieved, and the findings provide valuable insights into the topic.

The research was supported by a grant from the National Science Foundation, and the authors would like to express their gratitude to the funding agency for its support. The authors also thank the participants for their contribution to the study and the reviewers for their constructive comments. The paper is published in the *Journal of Applied Psychology*, Volume 95, Number 1, 2010.

667 x 1000

The first part of the paper discusses the importance of the research and the objectives of the study. It then presents a literature review of the existing research on the topic. The second part of the paper describes the methodology used in the study, including the data collection and analysis techniques. The third part of the paper presents the results of the study, and the fourth part discusses the conclusions and implications of the findings. The paper concludes with a summary of the main points and a list of references.

The research was conducted in a systematic and rigorous manner, following the principles of good research practice. The data was collected from a representative sample of the population, and the analysis was carried out using appropriate statistical methods. The results of the study are presented in a clear and concise manner, and the conclusions are based on the evidence gathered.

The findings of the study have important implications for the field of research, and they provide valuable insights into the issues being studied. The research also highlights the need for further investigation in this area, and it suggests some potential areas for future research.

In conclusion, the study has shown that the research is of high quality and that the findings are reliable. The results of the study are presented in a clear and concise manner, and the conclusions are based on the evidence gathered. The research also highlights the need for further investigation in this area, and it suggests some potential areas for future research.

The first part of the paper discusses the importance of understanding the cultural context of the research. It highlights the need for researchers to be sensitive to the values and beliefs of the communities they are studying. This is particularly important in the field of education, where cultural differences can significantly impact learning outcomes. The paper then moves on to discuss the challenges of conducting research in culturally diverse settings. It notes that researchers often face difficulties in establishing rapport with participants and in interpreting their responses. To address these challenges, the paper suggests several strategies, including the use of local researchers and the development of culturally appropriate research instruments. The final part of the paper discusses the importance of ethical considerations in cross-cultural research. It emphasizes the need for researchers to obtain informed consent from participants and to ensure that the research is conducted in a way that respects the dignity and rights of all individuals.

The first part of the paper discusses the importance of the research and the objectives of the study. It then presents a literature review of the existing research on the topic. The second part of the paper describes the methodology used in the study, including the data collection and analysis techniques. The third part of the paper presents the results of the study and discusses the implications of the findings. The final part of the paper concludes the study and provides recommendations for future research.

The research was conducted using a quantitative approach, with data collected from a sample of participants. The data was then analyzed using statistical methods to identify patterns and trends. The results of the study indicate that there is a significant relationship between the variables being studied. This finding has important implications for the field and suggests that further research is needed to explore the underlying mechanisms.

The study was limited by several factors, including the sample size and the potential for bias. However, the findings are consistent with previous research and provide valuable insights into the topic. The authors recommend that future studies should build on the current findings and explore the topic in more depth.

667 x 1000

The first part of the paper discusses the importance of the research and the objectives of the study. It then moves on to a literature review, which provides a background on the topic and identifies the gaps in the existing research. The methodology section describes the research design, data collection, and analysis. The results section presents the findings of the study, and the conclusion summarizes the main points and offers suggestions for future research.

The research was conducted in a systematic and rigorous manner, following the principles of good research practice.
