## Configuration

You can directly start using the Label Suggester add-on without any configuration. Use the configuration to refine or improve your label suggestions within your custom business case.

You can find the configuration dialogs within the Confluence administration within the menu "Label Suggester".

## Labels

The configuration dialog for labels allows you to adjust the basic behavior of the add-on, like

- enabling or disabling suggestions for specific content types (for instance blogs or pages),
- setting the number of shown results.

## Label configuration

### Suggestions

Configure the number of shown suggestions.

Number

### Content type

Configure the content type suggestions should be shown for.

- ☒ Page
- ☒ Blog Post

Save

Reset

## Word Search

Use this configuration dialog to setup the used search algorithms.

### General

#### Word

Here you can define, which words should be considered, how long a word can be and so on.

## Word search configuration

**General** Ignored words

Word Ranking

### Length

Configure the minimum and maximal length of words.

Minimum length

Maximal length

The maximal length is optional and will only be considered with a value for the word search.

### Character

Configure characters which are not allowed within words.

- ☒ Numbers
- ☒ Minus
- ☒ Underscore

### Type

Configure the words type.

This configuration will only be used for German and English content.

☒ Noun  
☐ Adjectiv  
☐ Verb

Save Reset

## Ranking

Here you can configure the weight (importance) of found words within a specific context of the content, for instance the title or hyperlinks.

### Word search configuration

**General** Ignored words

Word Ranking

Optimize the word search for your content and configure weights for your ranking factors.

#### Occurences

Configure the weight for occurrence of word within the title and content.

Example: The "exemplary" word occurs twice within the content and once within the title. With a weight of 1 the word has a total weight of 3.

#### Title

Configure an additional weight for title occurrences.

#### Text markup

Configure additional weights for words within markup.

Primary Title (h1)

1. Subtitle (h2)

2. Subtitle (h3)

3. Subtitle (h4)

4. Subtitle (h5)

5. Subtitle (h6)

Hyperlink (a)

Bold (b)

String (strong)

<input type="checkbox"/> afterwards	Englisch	Delete
<input type="checkbox"/> again	Englisch	Delete

### Import

Use this dialog to import or add new ignored words manually. You can download word lists in different languages from [stopwords.org](http://stopwords.org).

Also German and English use advanced natural language processing, we recommend importing their list of stopwords to further improve suggestions.
